Dear Robert,

Wind River Systems is pleased to provide you with the following quotation to renew the maintenance contract for your Wind River License number 15 for the Rocky X Rover Project. Support is valid to END DATE and is currently covered by your purchase order 1239533.

To renew support, we must have a copy of the purchase order faxed to (510) 749-2119, ATTN: Ann Brockway. Please include above reference number on your purchase order.

SALES TAXES:

Items listed below will be subject to sales tax unless otherwise specified on your purchase order. If items are not taxable your Purchase Order must clearly state the type of exception being claimed and the associated exemption number. Additionally, a copy of the appropriate certificate must be included with your Purchase Order, if Wind River Systems does not already have a copy on file. To verify that Wind River Systems already has a copy of your certificate please call your Inside Sales Representative.

Please note Maintenance Contracts will be subject to Sales Tax in most states as the contract includes product upgrades, which are treated as Tangible Personal Property.

and where applicable

CANADIAN GST, HST AND QST SALES TAXES

Wind River Systems Inc. assesses the appropriate General, Harmonized and Quebec Sale Taxes on ALL Sales shipped to Canada.

List of Products to be supported by **Jet Propulsion Laboratory**

Note* if your Tornado Pro or Power Pro seat included a CodeTest module, Wind River is not able to renew support for that product at this time. We apologize for this inconvenience. However, if you call for technical assistance for your CodeTest product, we will try to assist you as best as we can.

REINSTATEMENT OF LAPSED MAINTENANCE

A lapsed contract may be reinstated upon payment of a reinstatement fee equal to 50% of the Support and Maintenance fee, payable in advance along with the one-year support and maintenance contract fee.

1. Description of Products and Services

Standard support includes product update releases, Software Problem Report (SPR) resolution, WindSurf and telephone hot-line support for usage questions, etc.

Support will be provided to (see number of users above) technical contact located at the site listed above. You are currently listed as the technical contact.

2. Terms

All payments are Net 30 days upon approval of credit. Wind River Systems will pay freight charges. **Items listed above will be taxed unless otherwise specified on your purchase order. If these items are tax exempt or for resale please include a copy of the appropriate certificate with your purchase order, if Wind River does not already have a copy on file.**

3. Validity

All prices are quoted in US\$ dollars and are valid for 30 days.

Sincerely,
WIND RIVER SYSTEMS

EXCITING NEWS FROM WIND RIVER!

Wind River is please to announce the release of Tornado 2.2!

As a general update to the Tornado II platform, Tornado 2.2 will be available at no charge to Tornado customers and WindLink partners with an existing maintenance agreement.

Tornado 2.2 is a substantial update and re-release of the Tornado II platform. Tornado 2.2 will be released in August 2002, and will be the standard Tornado II platform shipping for all major target architectures.

Key features of Tornado 2.2 include:

- An updated version of VxWorks (VxWorks 5.5)
- New GNU and Diab compiler support
- An updated run-time and BSP packaging model
- A large number of enhancements and bug fixes throughout the product line
- FlexLM license management
- Support for the latest versions of Windows and Solaris
- Support for all leading target architectures, including many new processor derivatives

Don't miss out on this great opportunity – contact your Renewals representative today to ensure your support is valid to receive this latest release!
